

TV Movies, Shorts and Series

As my larger lists cover only theatrically released features and shorts, I felt the need to create this smaller, more informal list to mention some of the best, most notable or most infamous films that never got a theatrical release, plus TV shows and mini-series. Here you will find feature-length TV movies, short TV and/or Web movies, TV series, Web series, direct-to-video/DVD feature-length movies and feature-length films that played only a handful of non-major film festivals and were then released to video/DVD. The rating system for feature-length movies on this list is the same as the one for theatrically released movies (0-5 with quarter-star increments), keeping in mind I am holding them to the same high standards as theatrical releases. (And for teleplays, which are included under TV movies, I've tried to take into account the fact that they are a very different type of animal. But despite their theatrical aesthetic, they are ultimately judged as filmed entertainment, since trying to guess as to what the experience would have been like live and on stage seems a futile and haphazard exercise.)

The scale for TV and Web series and TV mini-series is similar to my scale for movies, but it lacks quarter-stars. (It's 0-5 stars with half-star increments.) The scale for TV shorts is the same as my scale for Short Films (0-5 with no half- or quarter-stars). Please note that feature-length movies are listed here only if they never received any type of theatrical release (which could include screenings at two or more major film festivals). If a made-for-TV or direct-to-video/DVD movie was later screened theatrically (either in general/limited release or at major film festivals), you can find it on the larger, theatrically released lists (with a **TV** designation after). **All movies and series are organized alphabetically.** Ratings for TV series try to take into account the quality over the entire run but also make mild allowances for the fact most series do not maintain high quality throughout their run, especially if the series lasts many years. Long-running, high-quality series are given slightly more credit than short-run (one or two seasons) series. For a guide to colors, see [Key](#).
